the success of any interview or questionnaire depends upon good question design yet most of the available literature has been devoted to interview techniques rather than question formulation this practical book provides a coherent theoretical basis for the construction of valid and reliable questions for interviews and questionnaires the theoretical framework used in the book provides a set of principles that when followed will increase the validity and reliability of verbal data collected for social research dr foddy outlines the problems which can arise when framing questions with clarity and commonsense he has written a wide ranging useful book for survey practitioners working in the social sciences

from the initial investigation of a crime to the sentencing of an offender many everyday practices within the criminal justice system involve complex psychological processes this volume analyzes the processes involved in such tasks as interviewing witnesses detecting deception and eliciting eyewitness reports and identification from adults and children factors that influence decision making by jurors and judges are examined as well throughout findings from experimental research are translated into clear recommendations for improving the quality of evidence and the fairness of investigative and legal proceedings the book also addresses salient methodological questions and identifies key directions for future investigation

this volume collects gigerenzer s recent articles on the psychology of rationality this volume should appeal like the

earlier volumes to a broad mixture of cognitive psychologists philosophers economists and others who study decision making

this volume brings together a range of contributors from europe and north america all contributions were especially commissioned with a view to identifying a major multidisciplinary topic that is of concern to both academics and practitioners the focus of the book is on expert judgment and its interaction with decision support systems in the first part the nature of expertise is discussed and characteristics of expert judges are described issues concerned with the evaluation of judgment in the psychological laboratory are assessed and contrasted with studies of expert judgment in ecologically valid contexts in addition issues concerned with eliciting and validating expert knowledge are discussed demonstrations of good judgmental performance are linked to situational factors such as feedback cycles and measurement of coherence and reliability in expert judgment is introduced as a baseline determinant of good judgmental performance issues concerned with the representation of elicited expert knowledge in knowledge based systems are evaluated and methods are described that have been shown to produce improvements in judgmental performance behavioral and mathematical ways of combining judgments from multiple experts are compared and contrasted finally the issues developed in the preceding contributions are focused on current controversies in decision support expert judgment is utilized as a major input into decision analysis forecasting with statistical models and expert systems
